YOU **DREAM** IT, WE **BUILD** IT.

Our Product

Safety
Is more impact resistant than glass. If subjected to impact beyond the limit of its resistance, it does not shatter into small slivers, but breaks into comparatively large pieces.

Weather Resistance
Will withstand exposure to blazing sun, extreme cold, sudden temperature changes, salt water spray, etc. It will not deteriorate after many years of service because of the inherent stability of acrylic resins.

Dimensional Stability
This product expand and contract due to changes in temperature and humidity, it will not shrink with age

Rigidity
Is not as rigid as glass or metals. However, it is more rigid than many other plastics such as acetates, polycarbonates or vinyls. Under wind load an acrylic sheet will bow and foreshorten as a result of deflection.
